

Hawkeye is a free, open-source app that lets any Nigerian at a polling unit photograph the result sheet (Form EC8A) announced there and add it to a public record anyone can check. Reports from the same unit are compared with each other and with the copy INEC uploads to its IReV portal, so agreement, or a mismatch, is visible to all. Hawkeye is independent and nonpartisan: it does not declare results, it is not a rival count, and it is not affiliated with INEC or any party or candidate.

KEY FACTS

What it is	A free app for citizens to photograph and report the result announced at their polling unit, and compare it with INEC's IReV.
Available on	Hawkeye and Hawkeye Lite for Android and iPhone, and on the web at hawkeye.com.ng . Get the app →
Cost	Free. No advertising.
Code	Open source on GitHub , with an open verifier library anyone can run.
Languages	English, Hausa, Igbo and Yorùbá.
Polling units	All 176,846 on INEC's register can be reported.
Run by	IniXien Hope Initiative, a Nigerian non-profit (registration in progress). Its sister company, IniXien, LLC, grants it perpetual free use of Hawkeye.
Affiliation	Independent and nonpartisan. Not affiliated with INEC or any party or candidate. Official results are those declared by INEC.

KEY DATES

Saturday, 12 December 2026

National Practice Day. Observers across Nigeria run the same mock election, 08:00–18:00 WAT. Only the combined count is shared, and practice is never counted as a result.

[About Practice Day →](#)

Saturday, 9 January 2027

National Practice Day. A final run, one week before the vote.

Saturday, 16 January 2027

Presidential and National Assembly elections.

Saturday, 6 February 2027

Governorship and State House of Assembly elections.

Election dates are set by INEC. Check inecnigeria.org for any change.

HOW IT WORKS

1. **Photograph the sheet.** At the polling unit, an observer photographs the announced result sheet and the venue in the app. Photos are taken live and GPS-stamped; gallery uploads are not accepted.
2. **Sign and record.** The report is signed on the observer's own phone, with a key Hawkeye never holds, and added to a public record that cannot be quietly edited.
3. **Compare in the open.** Reports from the same unit are compared with each other and with INEC's own sheet on IReV. A count is marked verified only when independent observers agree, and a disagreement is shown, never hidden.

CHECK IT YOURSELF

- **Open source.** The code is public on [GitHub](#), and the open verifier lets anyone re-check the record with their own tools.
- **Public ledger.** Every report is chained to the one before it, and the ledger's fingerprint is published in Sigstore Rekord, an independent public log Hawkeye does not run. Anyone can [re-check it in the browser](#), with no account.
- **Photo privacy.** Result sheets are public, as INEC posts them at the unit. Photos of the venue, which can show voters, are never published. Phone numbers are stored only as one-way hashes.
- **Nonpartisan.** Hawkeye declares no winners and backs no party or candidate. It takes no political money and carries no advertising.

Press contact. For interviews and questions, email info@hawkeye.com.ng or call +234 907 872 7777.
